## LPA Lighting Systems selected by LUL to design, manufacture and supply Central line and Waterloo & City line rolling stock interior Saloon LED Lighting

**LPA Lighting Systems**, part of the LPA Group PLC, are delighted to announce that we have been selected by LUL (subject to contract) for the Central line and Waterloo & City line rolling stock interior Saloon LED Lighting supply scope.

The project is valued at over £4m over the coming 5 years with ongoing support through the life of the existing rolling stock.

The LED lighting system will be developed specifically for the refurbishment of the existing rolling stock which is due to operate through to the end of the rolling stock's operational life. Design and manufacture will be performed at LPA's new manufacturing facility in Normanton, West Yorkshire, UK.

John Hesketh, MD of LPA Lighting Systems commented *"this is a fantastic achievement for LPA, one that will see LPA LED lighting on the popular Central, Waterloo & City lines rolling stock in London and reinforces our credentials as a worldwide, high reliability lighting supplier to the rail rolling stock and infrastructure sectors. The team have worked extremely hard to make this happen and we look forward to continuing our long association with LUL"*.

### About LPA Group PLC

LPA Group Plc is a world leader in the design, build and supply of LED lighting, electrical connectors/connection systems, and high performance electrical components. As a leader in innovation, LPA provides cost effective solutions which improve reliability, reduce maintenance and hence reduce life cycle costs, for operators and vehicle builders worldwide.

LPA Group products are used on high speed, mainline and metro trains. The range includes LED tubes, LED Smart Lighting, LED Modules, LED luminaires, door status lights, reading lights, USB and wireless chargers, relays and circuit breakers. LPA Group also specialise in the manufacture and supply of innovative high-reliability inter-car jumpers, electro-mechanical connectors and connection systems, 40Gbit/s-ready (over copper) Ethernet backbones and cable management systems.

### About London Underground Limited

London Underground, better known as the Tube, has 11 lines covering 402km and serving 270 stations. Opened in 1863, it is the world's oldest underground railway network, and one of the largest.

London Underground (LU) carries more than one billion passengers a year, as many as the entire National Rail network. Nearly five million journeys are made each day on 11 lines serving 270 stations. More services than ever before are now being run on the 155-year-old network.
